

# Accelerate Cloud and Modernization Strategies

## Visual COBOL & Enterprise Suite 8.0

Modernize your mainframe and COBOL applications for the cloud.

72% surveyed\* are on a modernization journey.

92% see COBOL as strategic.

#1 digital driver for COBOL applications is cloud transformation

## Enterprise Suite 8.0

Supporting new tools for mainframe modernization to the cloud.

**Modern mainframe development:** Linux-based tools for development and deployment on x86 Linux distributions.

**New host compatibility:** Supports PostgreSQL for faster deployment of Db2 data onto PostgreSQL and AWS Aurora.

**Secure, browser-based, zero footprint:** Embedded Host Access for the Cloud TN3270 emulator.

## Visual COBOL 8.0

Supporting new development tools and platforms for COBOL application modernization.

**Leading COBOL tools:** New support for Visual Studio 2022, VS Code, Eclipse and Windows Subsystem for Linux.

**COBOL modernization:** .NET 6.0, with COBOL to deployment to Windows and Linux.

**Data modernization tools:** Rapidly adopt Relational database access and scalable cloud architecture.

**New Cloud trials:** Available through Azure, AWS, and Google Cloud.

Take advantage of these new Micro Focus solutions to create greater value from your existing COBOL and mainframe applications. Fast track your digital transformation journey to the cloud using the latest Enterprise Suite and Visual COBOL technology.
