Changes ahead

SAP S/4HANA is new ERP software launched by SAP that is designed to replace all current ERP releases by 2025.

SAP S/4HANA is based on new technologies especially the in-memory technology of SAP HANA. Functions and processes have been simplified, cleansed, and readjusted. A wide range of SAP and third-party solutions can now also be connected with less effort.

The migration to S/4HANA requires changes in the underlying IT landscape, whether you are undertaking a conversion, a brownfield, or a greenfield approach.

But many companies feel their hands are tied: SAP S/4HANA is new ERP software launched by SAP that was designed to replace all current ERP releases by 2025. S/4HANA is based on new technologies, especially the in-memory technology of SAP HANA. Functions and processes have been simplified, cleansed, and readjusted. A wide range of SAP and third-party solutions can now also be connected with less effort.

The migration to S/4HANA requires changes in the underlying IT landscape, whether you are undertaking a conversion, a brownfield, or a greenfield approach.
