

# Automation Across the Enterprise

Gartner says automation will **“make or break”** the data center and cloud environments in terms of agility and cost containment. They recommend that **“IT operations leaders... should follow a systematic approach.”**

**We agree.**

**50:50:100**

By 2020, IDC predicts 50 billion internet-connected devices, 50X more data, and 100% of businesses using cloud.

- Automation is a prerequisite for cloud**
- The longer you leave it, the harder it becomes**
- 81% believe cloud provides competitive solutions for IT**
