Best of Data Center Automation

DCA is an expert in database and middleware automation.

- DCA integrates provisioning, patching, compliance, and remediation across a multivendor data center.
- DCA delivers results.

What Makes DCA Stand Out?

DCA is a leader in IT infrastructure compliance.

Customer results show the DCA difference.

Here's a look at some success stories:

- Multinational telecommunications customer
- Global banking customer
- Global customer experience customer

Did you know?

- 3 of the top 5 banks in the U.S., and 2 of the top 5 banks in Europe rely on DCA database and middleware automation.

DCA Delivers Results.

Customer stories show the DCA difference.

Here's a look at some success stories:

- Did you know?
  - DCA deploys on a modern container platform.
  - Did you know?
    - DCA container deployment is based on Kubernetes, Apache Airflow, and Anthos to ensure best practices for high availability, performance, and security.

Discover the DCA Difference:
microfocus.com/dca

- Achieve single-platform database patching
- Provision across environments
- Automate regulatory compliance
- Increase Security, Improve Efficiency, Deliver Faster

Increase Security, Improve Efficiency, Deliver Faster

$3M USD

Estimated annual savings

Patch the entire Oracle estate

6 weeks

1 week

$35M USD

Efficiency savings over 5 years

Run PCI and SOX audits across all systems

100%

Elimination of manual handoffs

Provision servers end-to-end

2 weeks

1 day

Did you know?

- DCA supports the broadest range of multivendor server OS, database, and middleware platforms with out-of-the-box provisioning templates, compliance content, and orchestration workflows.
- Did you know?
  - 3 of the top 5 banks in the U.S., and 2 of the top 5 banks in Europe rely on DCA database and middleware automation.

Discover Provisioning Utilities

- Code release
- Migration
- Configuration
- Upgrades

Discover Compliance

- PCI
- SOX
- FISMA
- ISO 27001
- NERC
- DISA
- HIPAA

DCA is like a DBA, only it's automated

- Did you know?
  - DCA container deployment is based on Kubernetes, Apache Airflow, and Anthos to ensure best practices for high availability, performance, and security.

DCA delivers on a modern container platform.
