

Build Secure Software Fast with Fortify SAST

- ✓ **Find and fix** security vulnerabilities early and often with integrated SAST.
- ✓ **Launch fast, automated scans** from the Fortify platform or via your IDE and CI/CD pipelines.
- ✓ **Protect against** open source component vulnerabilities with Sonatype software composition analysis.
- ✓ **Cover languages** that your developers love with support for 27 major languages and frameworks.
- ✓ **Fix at the speed of DevOps** with machine-learning assisted auditing, rich analysis, filters, and issue templates.
- ✓ **Scale your AppSec program** with a static analysis farm that can be dynamically scaled to meet the changing demands of the CI/CD pipeline.
