

Enable Developers to Code with Security in Mind

Secure your code from the start, with Fortify and Secure Code Warrior:

Equip developers to think and code with a security mindset.

Gamified Training.
Real-time coaching.

Provide immediate access through the Fortify "Get Training".

Seamless Integration

Fortify application security testing protects your entire software development lifecycle with the most automated, integrated, enterprise-scale on-premises and cloud solutions.

Secure Code Warrior enables developers to think and code with a security mindset through gamified training and real-time coaching—empowering them to be the first line of defense for your organization.

- ✓ Achieve faster and more secure product development.
- ✓ Defend your organization via security-conscious developers.
- ✓ Build a positive security culture.

Secure Code Warrior Access

From Fortify on Demand

1. Drill down into Applications → Releases and choose an issue to view.
2. Choose the "Recommendations" tab.
3. From the Recommendations tab, scroll down to "Interactive Training" and click the "Launch Training" link.

From Software Security Center (SSC)

In the Audit view of a Security issue in Software Security Center, the "Get Training" link will open a training module on the issue if it is mapped from Fortify to Secure Code Warrior.

Fortify On Demand and Software Security Center users have immediate access to targeted on-demand training in Secure Code Warrior as a value-added freemium* offering.

*Fortify on Demand provides limited functionality of Secure Code Warrior's gamified training to customers. For full access to Secure Code Warrior's offerings, please visit: <https://securecodewarrior.com>.
