

Manage and Keep Your IT Assets Compliant

Micro Focus Asset Management X manages your IT and software assets for greater value and less risk.

Stop your asset guessing game

Stop wondering what and where your IT assets are. With Micro Focus Asset Management X (AMX), you can confidently discover and manage all your IT assets.

Clearly see your entire IT asset portfolio with native discovery of hardware and software, both on premises and in the cloud.

Know how assets deliver IT services and business-critical applications with native service asset and configuration management (SACM).

Reduce software audit risks

Avoid over-consumption or under-utilization of your software with Micro Focus Asset Management X (AMX).

Deliver installed and running software metrics for smarter software license rationalizations.

Manage software licenses consumed against your entitlements to reduce audit risks.

Cover most common and customized software with out-of-the-box vendor options and included SDK.

Accelerate asset fulfillment

Make requesting, ordering, and fulfilling assets easier for your entire organization with Micro Focus Asset Management X (AMX).

Request new or replacement assets easily from pre-approved vendor catalogs or stock on hand.

Centrally manage your vendors and contracts to easily take action on expiring contracts or leases.

Automate asset fulfillment with customizable workflows for end-to-end procurement.

Control your asset costs

Centralize financial management with Micro Focus Asset Management X (AMX)

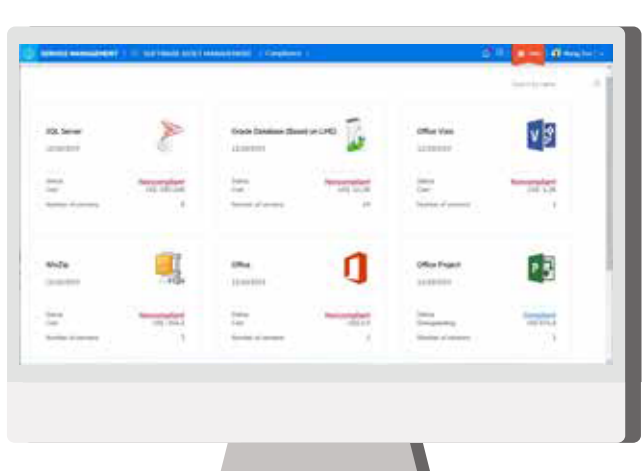

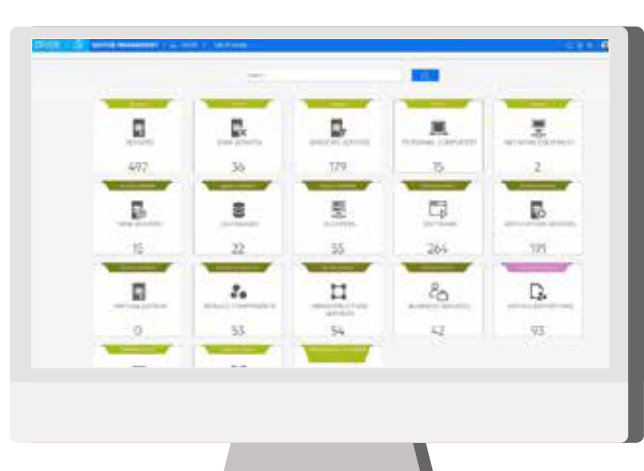

Easily assign asset costs to cost centers, departmental budgets, and more.

Plan replacement schedules and costs to cost centers, departmental budgets, and more.

Manage the entire asset lifecycle through a single tool for reduced management costs.
