

Run and Transform

Micro Focus + Jaguar Racing

Different tracks. Same race.

Jaguar Racing competes in the ABB FIA Formula E World Championship, an all-electric race series.

Micro Focus delivers mission-critical software to 40,000 customers around the globe.

Jaguar Racing and Micro Focus may be competing in different areas, but we're both striving to use technology to improve outcomes. So we're competing on different tracks, but we're in the same race.

The View from the Cockpit

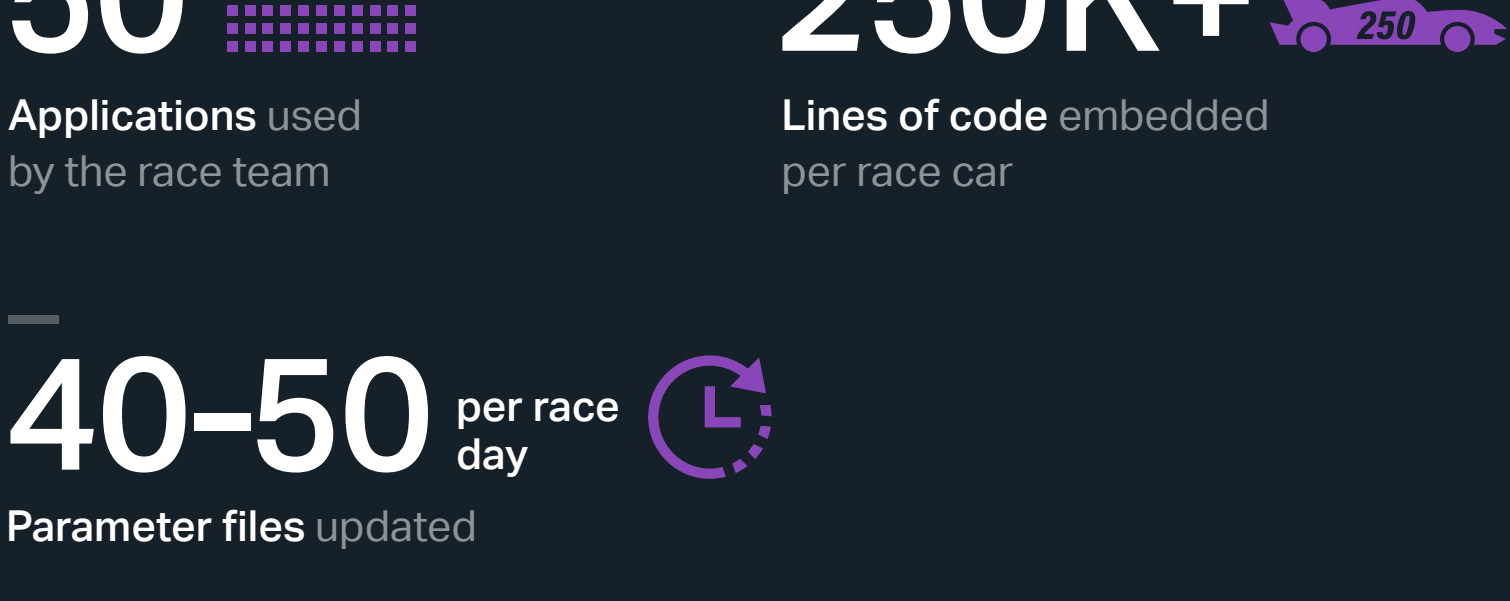

The cockpit is full of important and timely details. But it isn't the whole story. You have to balance in-race data (track conditions, energy management, competitors' positions) with strategic data (optimizing hundreds of parameters, analyzing fan input) to improve your performance. For Jaguar Racing, we do it in four key areas:

- 01 **Core Applications Powering Results**
- 02 **Data-Driven Racing**
- 03 **Cloud-Based Racing Model**
- 04 **Secure Race Analytics**

We're working with Jaguar Racing to balance all of these critical inputs—before, during, and after a race—so they can compete at ever-higher levels for more points, podiums, and wins.

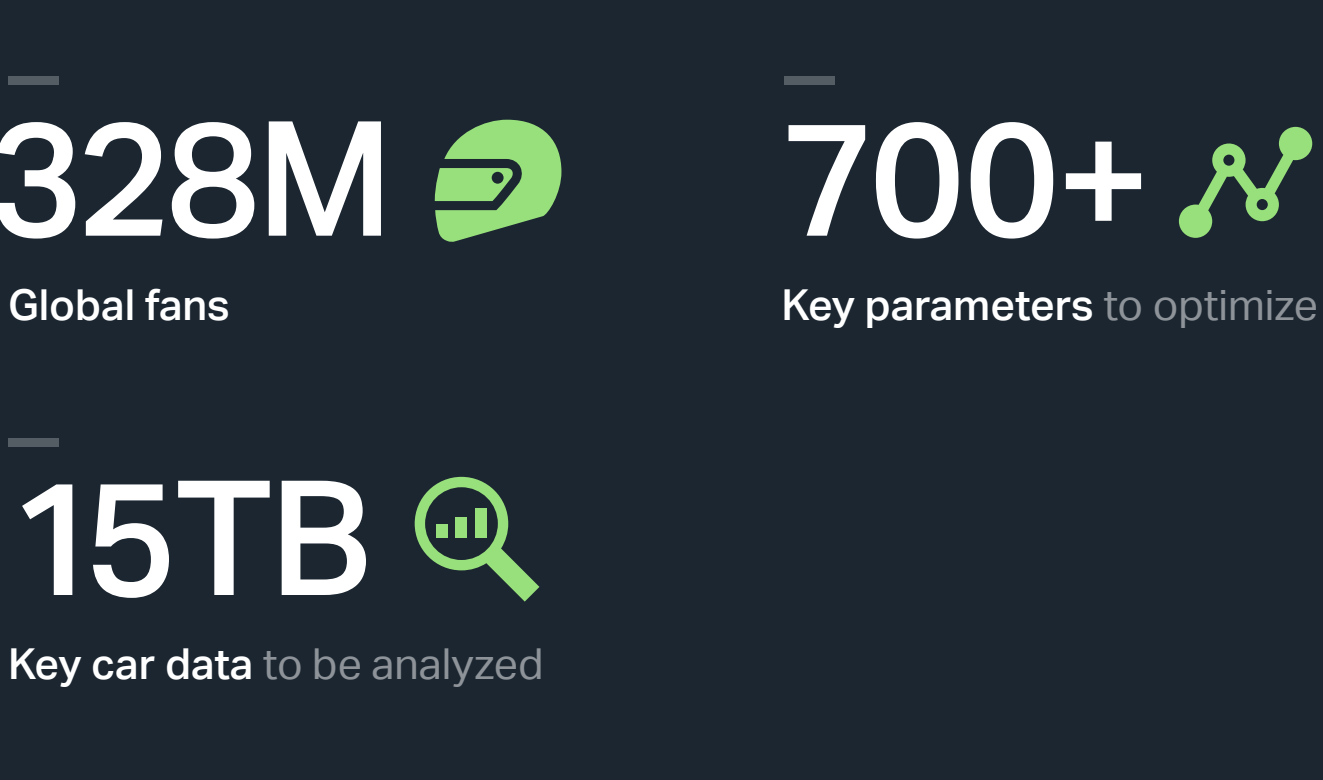

01 Core Applications Powering Results

Micro Focus speeds application delivery and reduces risk.

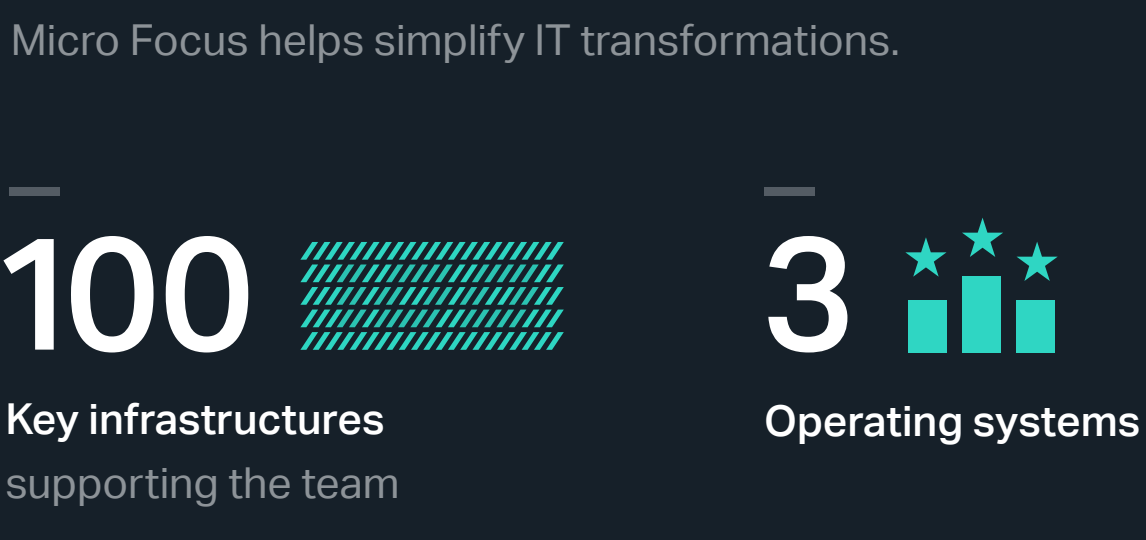

02 Data-Driven Racing

Micro Focus increases prediction speed and accuracy.

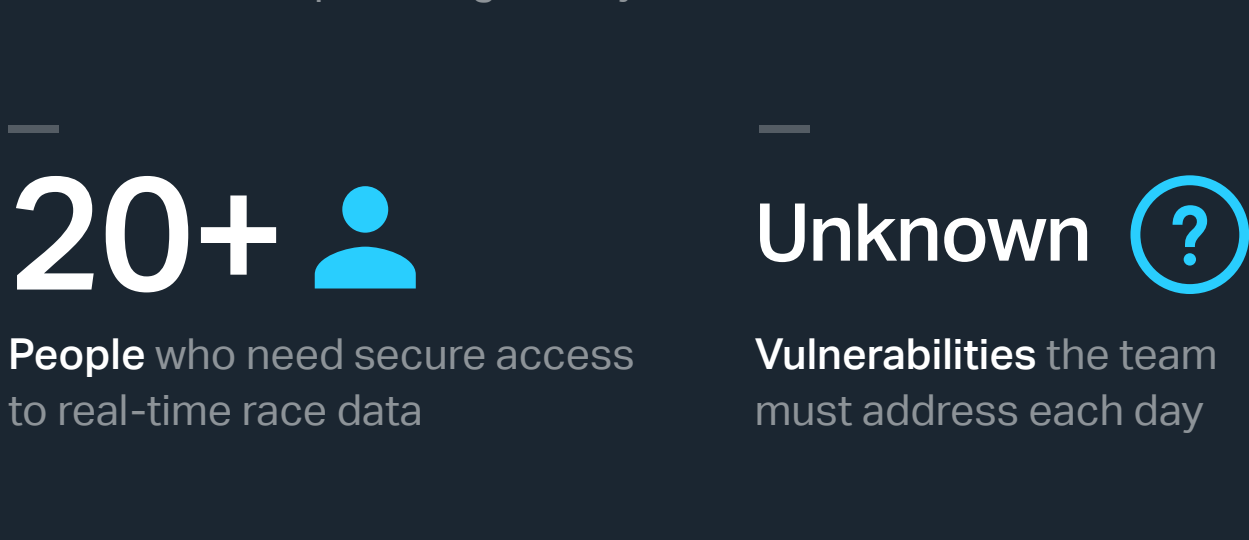

03 Cloud-Based Racing Model

Micro Focus helps simplify IT transformations.

04 Secure Race Analytics

Micro Focus helps strengthen cyber resilience.

Partnership Matters

As the official technical partner for Jaguar Racing, our world-class software works behind the scenes to help drive improvements and results in the fast-changing environment of Formula E.

We do the same for all of our customers—driving the outcomes they need to run today, and helping them to take advantage of opportunities in the evolving digital economy.
