

Scaling Up RPA

Two capabilities you need to succeed

We asked companies around the globe about their experiences adopting and scaling RPA. Here's what we learned.

Current State of RPA

89%

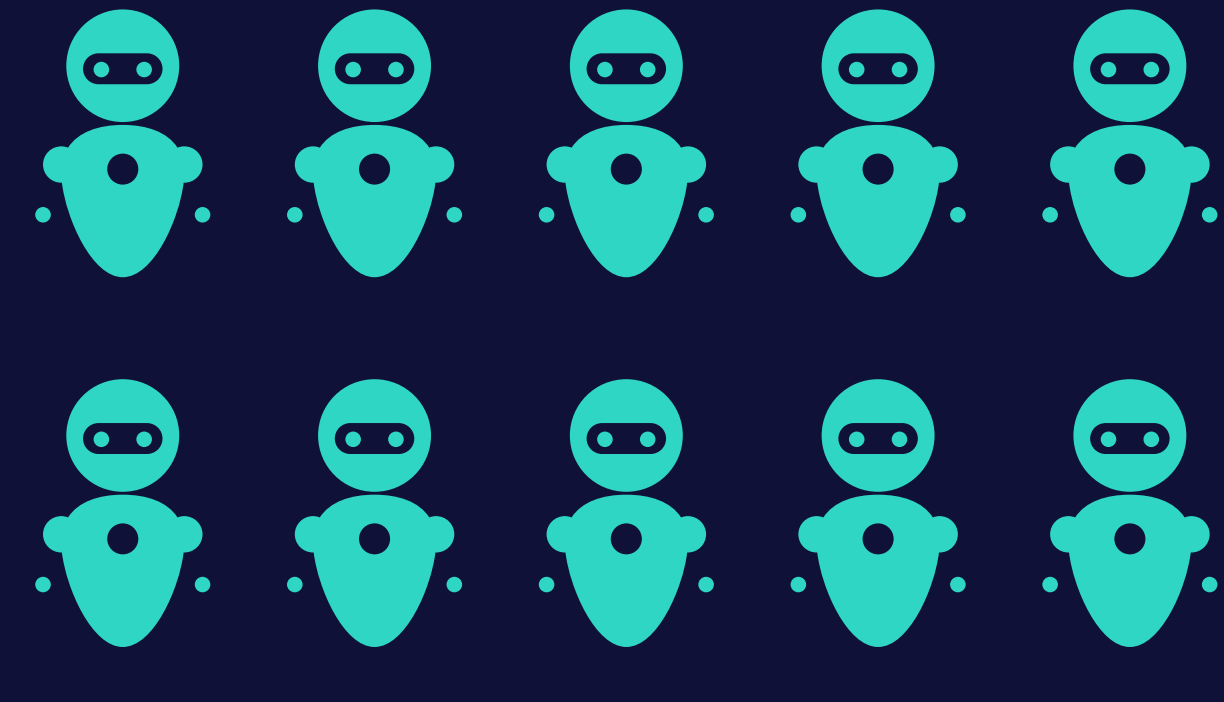

of RPA projects are highly successful.

-  Faster processes
-  Fewer errors
-  Lower costs
-  Higher productivity

But robot deployments remain small.

57%

of companies deploy 10 or fewer robots.

Top Two RPA Scaling Challenges

Companies say—

- 1 "Integrating RPA with other technologies is hard."
- 2 "Security risks are not well understood."

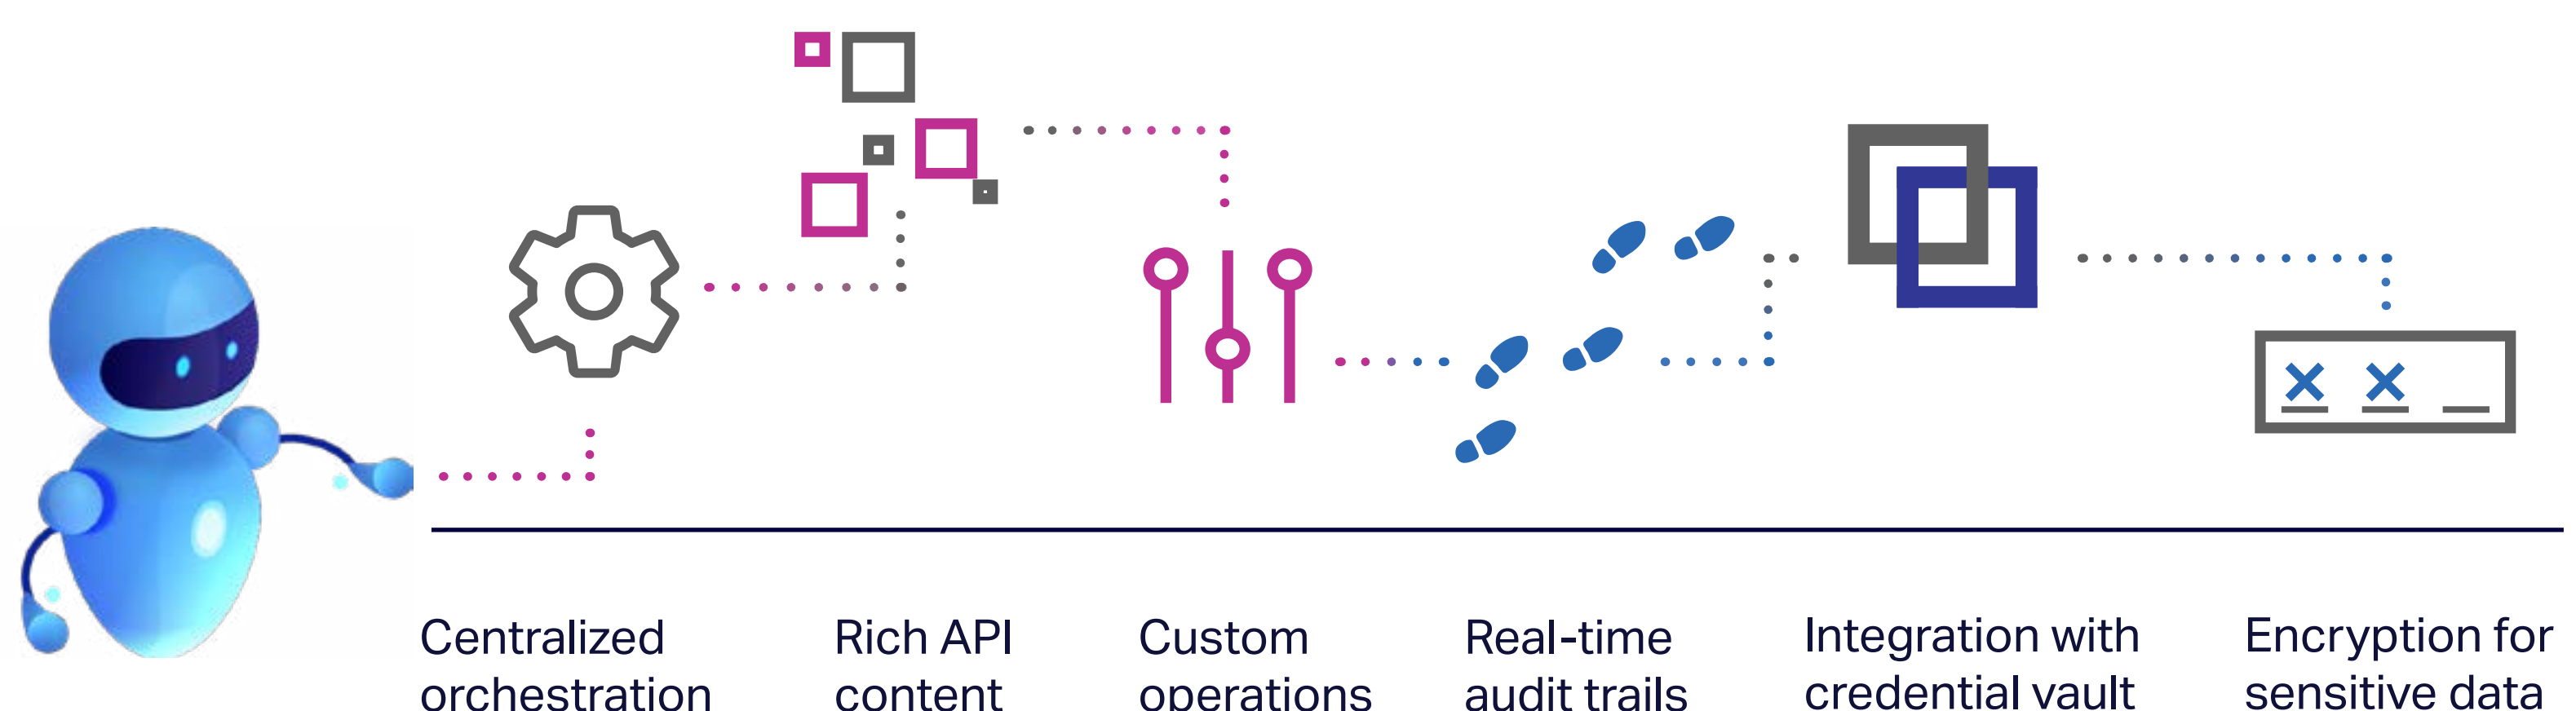

Top Two RPA Capabilities Needed

Companies require—

- 1 APIs for integrating with other technologies
- 2 Enterprise-level security

Scale Up with Confidence

Micro Focus RPA has the integration and security capabilities you need—
