

The Path to Autonomous Operations

Buckle up and get ready for a flight that leads to clear visibility into cloud, hybrid IT, and traditional IT environments.

84% of businesses say their IT organization is trying to consolidate events, metrics and data across IT-led resources and services.

"Operations Bridge is the best solution to integrate third-party data into a true common view of IT; nothing comes close."

LUKE BRADLEY
Vodafone Group Services Limited

Consolidation is required for true service-driven **Autonomous Operations**

... but most tools don't have what it takes ...

What IT leaders are looking for

94% say they need an integrated hybrid cloud monitoring solution.

81% say end-to-end visibility is critical to operating a hybrid cloud.

What current tools are missing

73% fail to map infrastructure to specific cloud services.

73% lack operational control of PaaS or IaaS services.

62% can't manage multiple public cloud providers.

53% don't track service availability.

When it comes to correcting these issues, many IT organizations are **lost in the clouds**.

Fewer than 50% of companies can manage any one part of a hybrid cloud.

Over 50% of companies struggle to manage cloud costs and deploy effective monitoring.

"We need on-premises quality applied to cloud monitoring, in a single pane of glass. Operations Bridge is so far meeting or exceeding our expectations in doing that. What excites me the most is now we can expand to other domains, and it's transparent to the users."

BOB UMPHRED
DTCC

And now **containers** and **DevOps** are throwing new turbulence in the flight path.

When it comes to containers...

86% of organizations are considering them

yet

50% of companies are **blind** to container operations.

When it comes to DevOps...

87% of organizations are moving toward DevOps processes

yet

only 31% realize or expect to gain significant improvement in IT infrastructure stability.

Here's the bottom line: To get to autonomous operations, you need to integrate and analyse ALL your operations data

Micro Focus Operations Bridge customers report these gains:

47% increase in efficiency

45% faster identification of root causes

"The story is tying together all of the disparate systems. The OpsBridge is the only tool I know that lets you do that, and automate management from a single pane of glass."

JAY ROONEY
Vancity
