EUWID Europäischer Wirtschaftsdienst GmbH

Micro Focus® Retain™ Unified Arching is an easy but powerful archiving solution. All users within the organization have got fast and easy access to their archived emails.

Overview
EUWID is a specialized publishing house covering nine industries with its printed and online publications. More information can be found here: www.euwid.com

Solution
The EUWID was looking for a solution that was able to archive certain mail addresses securely and was easy to handle at the same time. With Retain Unified Archiving, the organization found what it needed—protection from data loss and email management within the organization.

"Retain is an easy but powerful archiving solution. All users within our organization have got fast and easy access to their archived emails—no matter where they are and no matter which workplace they use. Retain fulfills all our individual needs," explained Ulrich Reuter, System Administrator for EUWID.

About Retain Unified Archiving
Retain Unified Archiving archives all data within Microsoft Exchange Server and Micro Focus GroupWise®. Retain supports single-instance storage, which reduces storage space by up to 65%. Retain Unified Archiving’s database support includes all common databases, including MS SQL, MySQL, and Oracle, bringing more flexibility to your organization.
