

Fortify WebInspect

Industry-leading web application security assessment solution designed to analyze complex web applications and web services for security vulnerabilities

Micro Focus® Fortify WebInspect is a dynamic application security testing tool that identifies application vulnerabilities in deployed web applications and services.

20% Lower incident resolution time¹

- Cox Automotive diminished critical software flaws by 94% by adding WebInspect dynamic scans to the SDLC

34% Fewer post-deployment vulnerabilities¹

WebInspect provides the broadest dynamic application security testing (DAST) coverage and detects new types of vulnerabilities that often go undetected by black-box security testing technologies.

"Fortify solutions help us develop very secure applications that give our customers a positive experience with our products."²

WebInspect scans modern frameworks and web technology with the most comprehensive and accurate dynamic scanner.

15% Reduction in time-to-market¹

TONY SPURLIN

Chief Information Security Officer
Cox Automotive

20% Penetration test cost reduction¹

The product is easily deployable in enterprise environments, has exhaustive REST APIs to benefit integration, and has the flexibility to manage security risks either through the intuitive UI or run completely via automation.

Proof Points

- Micro Focus cyber security team successfully conducted over **1,800 web application testing scans in just six months**
- Micro Focus cyber security team **reduced the time for vetting cited vulnerabilities by over 50%**
