

What's your version? View the features and capabilities available once you've upgraded to the latest version of ArcSight ESM.

Feature	Benefit	7.5	7.4	7.3	7.2	7.0	6.11	6.9
Full Armor integration	Integration enables SOCs to use Active Directory users and groups to manage their ArcSight ESM user/group memberships	●						
ArcSight SOAR Integration	ArcSight SOAR can be used as a native solution within ESM, pairing real-time detection with automated threat response	●	●					
Interactive API documentation	Swagger integration supports a standards-based approach to REST APIs	●	●	●				
Consolidated storage option with ArcSight Recon	Consolidated Remote Storage enables ESM to forward its events to a unified storage repository to be used across the ArcSight SecOps platform	●	●	●				
Web-based shared UI dashboard	Modular widgets allow you to build customized, up-to date and relevant security dashboards	●	●	●	●			
MITRE ATT&CK dashboards	Gives a real-time view of all MITRE ATT&CK related events in your environment, and top threat techniques facing your SOC.	●	●	●	●			
CIRCL MISP integration	Integrates threat intelligence from CIRCL MISP, one of the largest open source threat intelligence platforms, integrates with ArcSight ESM through a dedicated connector	●	●	●	●			
Global ID	Assigns a unique ID to allow tracking of events throughout the ArcSight portfolio using a single, known event ID	●	●	●	●			
ServiceNow integration	Allows you to export ESM cases to ServiceNow ITSM	●	●	●	●	●		
Distributed correlation	Deploy multiple instances of correlators and aggregators to improve processing speed and provide failover processing, providing the ability to scale correlation up to 100K EPS per cluster	●	●	●	●	●		
IPv6 connectivity support	ArcSight components and high availability ESM clusters can communicate with each other using IPv6 communication	●	●	●	●	●	●	
ArcSight Command Center enhancements	New features like a dark theme UI, the ability to save dashlets as CSV files, navigation from dashboard to a channel, etc.	●	●	●	●	●	●	
Command Center usage metrics	ESM usage reporting displays daily EPS and GB for the last 30 days as both a chart and a grid	●	●	●	●	●	●	●
Network route evaluation	Tool command utilities enable you to evaluate the connections on the network used by a channel event	●	●	●	●	●	●	●
