

Micro Focus Adoption Readiness Tool (ART)

Micro Focus and our customers are using the Adoption Readiness Tool (ART) to create engaging digital learning content for training, on-boarding, and supporting our customers. ART enables you to rapidly generate learning content in various formats. Work Smart with ART and generate step-by-step job aids, product demonstration videos, simulated hands-on exercises, and online courses with assessments that boost the user adoption of Micro Focus business applications and other applications. The table below gives you an overview of the main functionality differences between ART and ART ELE Cloud.
