and Pensions

"When we rolled out the re-platformed application with [Micro Focus] Visual COBOL we actually saw an overall performance boost of more than 20 percent. Not only are our processes running faster, but we can scale out and run more concurrent processes."

CHUCK WAINSCOTT
Director of Architecture
FIS Asset Management Group

"When we first invested in COBOL decades ago, who would have thought that streaming music would even be a thing? But here we are, and it is testimony to the longevity of COBOL and the strategic direction of Micro Focus (now part of OpenText™) that we are successfully riding the digital transformation wave in our industry."
