

Operations Bridge and Application Performance Management

Comparing Operations Bridge Versions and Offerings

This is a version comparison chart for OpenText™ Operations Bridge and OpenText™ Application Performance Management showing recent product features.

Operations Bridge Feature	Benefit	Version	Feature Availability						
			2024	2023	2022	2021	2020	2019	2018
vROps management pack	Reduce your storage requirements with daily and hourly summarization to enable a lower retention period of raw data for vROps metrics	24.1	●						
MySQL management pack	Gain awareness of MySQL cluster degradation and replication services with the newly added Unified Content for MySQL Management Pack	24.1	●						
Oracle database management pack	Improve Oracle database performance by catching long-running queries and broken jobs in your Oracle database with our enhanced Oracle database monitoring	24.1	●						
SCOM Connector	Improved admin experience through the new unified UI to install, deploy, and configure from OBM	24.1	●						
Role-based access and security governance in Flex Reporting and BYOBI*	Gain better security and control of your reporting in Operations Bridge SaaS	24.1	●						
Multivariate Anomaly Detection of Azure Cloud Services*	Identify more subtle anomalies to troubleshoot quicker in Azure Cloud (already supported on AWS)	23.4	●	●					
Operations Bridge Manager (OBM) in OPTIC One GUI*	Unified UI visualizations across OpsBridge capabilities	23.4	●	●					
High-performance hyperscale observability collector for out-of-the-box support for applications using K8s, Prometheus, and Vmware collection	Minimizes blind spots across all cloud infrastructure monitoring	23.4	●	●					
Enhanced 3rd party integration with metric content for Dynatrace and AppDynamics into the OPTIC Data Lake*	More holistic view of metrics including these new sources, removes gaps in IT estate	23.4	●	●					
Infrastructure Management Pack 2023.05 P1 patch adds FileSystem utilization monitoring to threshold based on disk size range, also provides global and local filesystem exclusion	Better planning and alerting in FileSystems	23.4	●	●					
Remove the need for Operations Bridge Manager in Operations Bridge Premium – SaaS in many cases*	Improves TCO and saves time by reducing components you need to manage	2023.05	●	●					
Grafana is added to Bring Your Own BI (BYOBI) for SaaS*	Use the BI tool you know to build reports from the OPTIC Data Lake	2023.05	●	●					

● Feature available in this version

*Requires OPTIC Data Lake

Operations Bridge Feature	Benefit	Version	Feature Availability						
			2024	2023	2022	2021	2020	2019	2018
SiteScope is now deployable on OpenShift cloud platform	OpenShift users can now get the benefits of SiteScope	2023.05	●	●					
Customers can put historical SiteScope metrics in OPTIC Data Lake (ODL)*	Analyze new and historical data together	2023.05	●	●					
Monitoring Control Center (MCC) provides HTML-based APM administrative UI	Unified UI that's common among SiteScope, APM, and BPM	2023.05	●	●					
Filter metric data for virtualized entities in Operations Agent 12.4	Reduces network traffic and unnecessary data to the server	2023.05	●	●					
ML-based Probable Root Cause (PRC) of Automated Event Correlation (AEC) events*	Automatically finds and recommends casual events	2023.05	●	●					
Use 3rd party identity providers for user authentication	Match your infrastructure choices	2022.11	●	●	●				
Bring your Own Kubernetes (BYOK), now supporting even more Kubernetes distribution	More flexible data access	2022.11	●	●	●				
Deep monitoring of cloud infrastructure with multiple sources	Deeper performance insights into your cloud infrastructure	2022.11	●	●	●				
OPTIC One UI framework	Unified framework that's easier to use and common among all functions	2022.11	●	●	●				
Flex reports and dashboards using OPTIC One for web-based report creation*	Ease of use and faster insights	2022.11	●	●	●				
Late arriving data now fully automated	Saves time as no manual intervention is needed	2022.11	●	●	●				
AWS CloudWatch Alarms and Azure Monitor Alerts available as OBM events	Changes can be monitored easily	2022.11	●	●	●				
SRE/DevOps focused navigation for hyperscale cloud observability data	Quicker troubleshooting	2022.11	●	●	●				
Azure Kubernetes Service (AKS) and VMware Tanzu Kubernetes support	Integrate alerts from cloud services into OBM for better insight	2022.11	●	●	●				
Event Storm Detection Based on new category from 3rd parties	Reduce noise at the source	2022.11	●	●	●				
New store-and-forward buffer time configuration allows streaming data to be buffered for up to one day without data loss	More resilient operation	2022.11	●	●	●				
SiteScope dynamic failover to a second disaster recover location	Improved monitoring continuity	2022.11	●	●	●				
New account lockout that locks out user for a period after multiple failed login attempts	Prevent user security issues	2022.11	●	●	●				
Hyperscale Cloud Observability in Operations Bridge – SaaS	Collect more metrics from your cloud operations	2022.05	●	●	●				
Metrics collection for 3rd party tools in Operations Bridge and SaaS	Monitor performance as well as events for 3rd party tools	2022.05	●	●	●				
OBM configurable default workspace pages	Improved productivity, no more empty workspace on first login	2022.05	●	●	●				
OBM event browser now shows potential causes	Isolate problems quicker	2022.05	●	●	●				

● Feature available in this version

Operations Bridge Feature	Benefit	Version	Feature Availability						
			2024	2023	2022	2021	2020	2019	2018
Monitoring Control Center UI (MCC) for SiteScope and Cloud monitoring	Improved productivity with efficient workflows. For SiteScope manage multiple servers from one console	2022.05	●	●	●				
Kubernetes Monitoring Service	Increase unified monitoring with Kubernetes monitoring native on OpenShift	2022.05	●	●	●				
Delivered 20 user submitted enhancements, see release notes for details		2022.05	●	●	●				
OBM agent health dashboards	See all agent health in one place get notified of a problem	2022.05	●	●	●				
Federated SSO using AsumeRoleWithSAML – OpsBridge and APM	Use corporate standards for authentication	2021.11	●	●	●	●			
Stagger sending agent system data over time	Avoid flooding on the server	2021.11	●	●	●	●			
Support for Tableau, Power BI, Qlik to build your own reports on data in the OPTIC Data Lake	Use the BI tool you know to build reports from the OPTIC Data Lake	2021.11	●	●		●			
OBM Event Repository	Shows closed and open events in a single view	2021.11	●	●	●	●			
Smart Card Authentication (CAC) Support for APM	Comply with government requirements	2021.11	●	●	●	●			
AI-enabled Automatic Event Correlation (AEC) now performs automatic typing of events	Save time user no longer needs to provide this data	2021.11	●	●	●	●			
Integrated Data Center Automation (DCA) vulnerability scan	Speed troubleshooting by showing operations vulnerabilities as possible source of problem.	2021.11	●	●	●	●			
OPTIC Data Lake, Reporting, and Dashboards	See data from multiple domains in one view. Access data using your BI tool of choice.	2021.11	●	●	●	●			
Operations Bridge Integration Hub	Easier, single point to connect 3rd-party data with OBM	2021.11	●	●	●	●			
Support for FIPS 140-2-mode integration between SiteScope and OBM	Comply with government requirements	2021.11	●	●	●	●			
Operations Bridge Integration Hub	Easier, single point to connect 3rd-party data with OBM	2021.11	●	●	●	●			
Delivered 33 user submitted enhancements, see release notes for details		2021.11	●	●	●	●			
New low footprint deployment of OpsBridge on Azure Kubernetes Service (AKS) and AWS Elastic Kubernetes Service (EKS)	Reduce infrastructure costs supporting OpsBridge	2021.08	●	●	●	●			
Splunk Enterprise and Splunk SignalFX data via integration hub	See events and alerts from these tools in OBM	2021.08	●	●	●	●			
Delivered 7 user submitted enhancements, see release notes for details		2021.08	●	●	●	●			
JSON support in REST Webservice policies	Save time using a protocol developers are familiar with	2021.05	●	●	●	●			
Operations Bridge containerized components can now be deployed on cloud-managed Kubernetes	Save time using a Kubernetes implementation you're using with other applications	2021.05	●	●	●	●			

● Feature available in this version

Operations Bridge Feature	Benefit	Version	Feature Availability						
			2024	2023	2022	2021	2020	2019	2018
AppHub for OpsBridge	Easier, visual component installation OBM containerized components	2021.05	●	●	●	●			
BPM and composite infrastructure cross-domain reports	Better insights to your apps and infrastructure	2020.10	●	●	●	●	●		
OBM-Data Center Automation (DCA) composite reports so vulnerability trends with performance	Speeds troubleshoot	2020.10	●	●	●	●	●		
OBM delivers new HTML5-based Adobe Flash independent user experience	Improved speed	2020.10	●	●	●	●	●		
OBM Administration UI enhancements	Various efficiency options to reduce configuration time	2020.10	●	●	●	●	●		
AI-enabled Automatic Event Correlation (AEC)	Saves time from having to write rules	2020.10	●	●	●	●	●		
Vulnerability scanning functionality of Data Center Automation (DCA) as part of Operation Bridge Ultimate	Easier to prioritize the remediation after completing the vulnerability scan	2020.08	●	●	●	●	●		
BPM now ships with the latest version of Load Runner, certified with new browser and OS versions	No separate download need	2020.08	●	●	●	●	●		
Enhanced Import/Export APIs in SiteScope	Improved security, includes more data types	2020.05	●	●	●	●	●		
IPV6 installation support in SiteScope	Match your corporate standard	2020.05	●	●	●	●	●		
Windows monitoring from Linux	Better coverage of your environment for Linux users	2020.05	●	●	●	●	●		
Event browser shows open and historical closed events	Faster referral to historical data supports troubleshooting	2020.05	●	●	●	●	●		
Ad hoc downtime exclusions	Better represent performance during scheduled downtime	2019.11	●	●	●	●	●	●	
Launch SiteScope local client from the APM local client	Improve user efficiency	2019.11	●	●	●	●	●	●	
Multi-node event grouping based on user defined Configuration Item (CI) collections	Improved noise reduction	2019.11	●	●	●	●	●	●	
Unified System Infrastructure Reports (Agents and SiteScope)	Show status of all systems regardless of monitoring technology	2019.11	●	●	●	●	●	●	
Unit pricing structure for OpsBridge, BPM, RUM, SiteScope	Switch functions ex: BPM to RUM without having to purchase new license	2019.11	●	●	●	●	●	●	
Agentless monitoring of Kubernetes and Dynamic Docker using Prometheus APIs	Remove need to install agent for Kubernetes monitoring	2019.05	●	●	●	●	●	●	
Azure MP to support Azure Government cloud service with data into OPTIC Data Lake	Enables extension of government usage	2019.05	●	●	●	●	●	●	
OpsBridge Connector integration with OPTIC Data Lake	3rd party data now available in OPTIC DL	2019.05	●	●	●	●	●	●	
SiteScope integration with CyberArk for password management	Unifies password management for CyberArk users	2019.05	●	●	●	●	●	●	
RUM support for application deployment on AWS	Improved monitoring of applications deployed on AWS	2019.05	●	●	●	●	●	●	

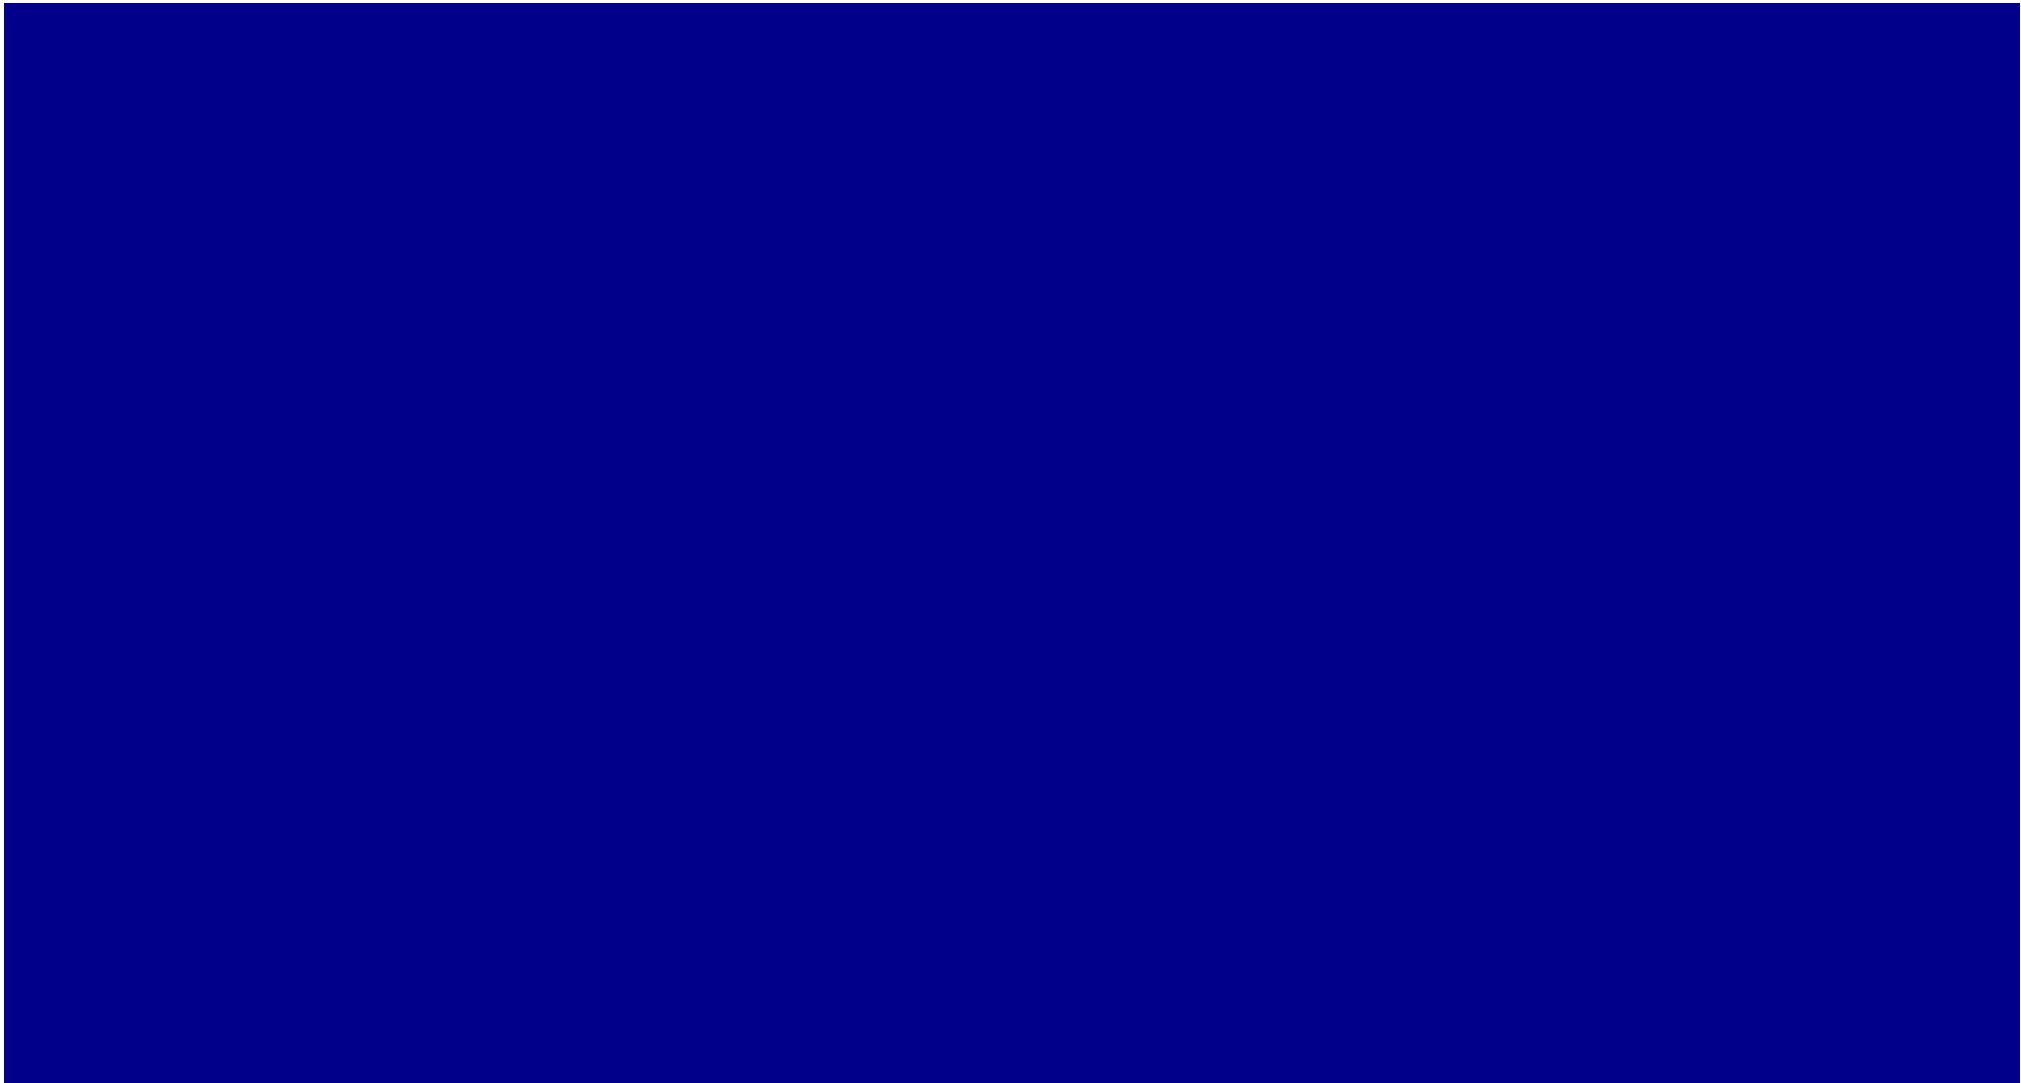

● Feature available in this version

Operations Bridge Feature	Benefit	Version	Feature Availability						
			2024	2023	2022	2021	2020	2019	2018
Solution template to monitor HDFS, Hbase, Yarn, ResourceManager and Zookeeper service	Unify monitoring of more tools	2019.02	●	●	●	●	●	●	
Scoring tool in event browser		2019.02	●	●	●	●	●	●	
Syntax checker for management policies		2019.02	●	●	●	●	●	●	
Watchlist by view		2019.02	●	●	●	●	●	●	
New CLIs to address automation of OpsBridge functions		2019.02	●	●	●	●	●	●	
BVD reporting on OPTIC Data Lake		2019.02	●	●	●	●	●	●	
Prometheus based docker monitoring in SiteScope		2019.02	●	●	●	●	●	●	
Automatic baselining and dynamic thresholding		2019.02	●	●	●	●	●	●	
Published OPTIC Data Lake schema and support for third-party BI tools	Increases user efficiency using a tool they already know	2019.02	●	●	●	●	●	●	
Central thresholding on OPTIC Data Lake		2018.11	●	●	●	●	●	●	●
Automatic Event Correlation		2018.11	●	●	●	●	●	●	●
Calculated metrics		2018.11	●	●	●	●	●	●	●
Cluster aware monitoring		2018.11	●	●	●	●	●	●	●
BPM and SiteScope data into OPTIC Data Lake for cross domain reporting*		2018.05	●	●	●	●	●	●	●
AWS Dynamo DB & Beanstalk services		2018.05	●	●	●	●	●	●	●
BVD report generation in pdf		2018.05	●	●	●	●	●	●	●
SiteScope Self service automation		2018.05	●	●	●	●	●	●	●
SiteScope desktop client UI		2018.05	●	●	●	●	●	●	●
Management Packs (over 100, not listed separately) are domain-specific add-ons to OpsBridge that provide pre-programmed intelligence for that domain, domain-specific reports, and correlation rules.		Updates annually	●	●	●	●	●	●	●

● Feature available in this version

*Requires OPTIC Data Lake
