

# Content Manager 10.1

Micro Focus Content Manager is a governance-based enterprise content management (ECM) system that provides complete information lifecycle management for enterprises across the globe. It is a comprehensive, out-of-the-box software solution that enables you to effectively manage and collaborate on documents and records, email, Web content, images, video, and workflows to achieve business objectives. Content Manager is all about bringing your information to life and managing it as efficiently and completely as possible from creation to disposal, beyond the lifespan of your projects, staff, and business applications.

## Insurance Company

**“With Content Manager, we didn’t have to change the way we run our business. It’s flexible. It adapted to us.”**

VP OF IT

### What's New with Content Manager?

- Content Manager provides greater value to the Total Cost of Ownership by offering further and deeper integration with Microsoft Technology:
  - Support for MS Teams to create records from chats/files automatically.
  - Filesystem Document Store for managing records without moving the original files.
  - SharePoint feature that supports owner mapping useful during consignments.
- The Content Manager web client user experience has been enhanced for a more productive and full configurable experience with Search and bulk operations. This includes:
  - A new switch that toggles Search results between the regular view and a new Grid view that lets users sort/arrange multiple metadata in column format reducing the number of clicks for bulk operations.
  - A new Mobile App native to Android and iOS for Mobile workers that supports search, creation, check in/out and offline functions.
  - Unlimited revisions to records and enhanced Alerts.
- Content Manager 10.1 provides greater efficiencies and reduces management overhead, including:
  - Full SQL Text Indexing to index metadata including Notes.
  - Support for IDOL, KeyView and Media Server 12.10.
  - Support for Windows 11 (64-bit) and Windows Server 2022 (64-bit).
  - Public Record Office Victoria (PROV) Version 3 VERS Encapsulated Objects (VEOs) compliant.
- Additional features included in this release improve security, productivity and efficiency, which includes:
  - AWS Storage—new authentication options for accessing S3 document stores.
  - Consignment templates that simplify the starting point of consignment creation in Advanced disposal processing.
