

Application Lifecycle Management (ALM/QC)

ALM is a powerful, single repository for teams to plan, build, and accelerate application delivery and drive innovation to enhance customer satisfaction. ALM provides complete visibility for the application lifecycle across all enterprise projects.

What's New Over the Last 2 Years

Micro Focus is delighted to announce the new release of ALM (Application Lifecycle Management) and QC (Quality Center), version 12.55.

- **ALM/QC 12.55 – More Value, No Upgrade!**
The latest release of ALM 12.55 delivers more value to end users and administrators. Here are some of the new features in ALM 12.55
- **Control and run your tests from a single location**
The Test Board tab allows users to display, select, and run all the test instances available in a selected Test Lab folder.
- **Accelerate team collaboration with new Microsoft Skype for Business integration**
- **Secure connection to the ALM mail server**
The mail service can now be configured manually or using AutoDiscover and supports SSL and StartTLS.
- **Audit the history of attachments**
It's now possible to track the history of an attachment through the AUDIT_LOG.
- **Install and run ALM on Amazon Web Services (AWS)**
- **Updated Supported Environments**
Microsoft Windows Server 2016 and Microsoft SQL Server 2016 are now supported.

- **Work with the latest version of Sprinter**
Sprinter 14.01 allows changes to test order through drag and drop, data Injection for tables, and storyboard screen capture improvements.
- **ALM Quality of Things (QoT)**
QoT is a whole new way to manage quality in the world of IoT. It is a new manual test execution client for online and offline testing.
- **ALM Synchronizer Updates**
The ALM Synchronizer now enables synchronization between ALM and JIRA.

Did You Know?

License Sharing With ALM Octane

ALM Octane is designed for high-velocity, Agile teams and integrates with both Agile Manager and ALM allowing teams to easily share assets and maintain cross project visibility. All ALM/QC customers with active support contracts are entitled to ALM Octane. Existing ALM licenses can be allocated to ALM Octane and can be changed dynamically if needed. The ALM Octane license must align to the current ALM/QC deployment (SaaS or On-Premise).

ALM/QC customers are entitled to the following ALM Octane editions.

ALM/QC License	ALM Octane License Entitlement
Quality Center Enterprise	ALM Octane Pro
ALM	ALM Octane Enterprise
Agile Manager	ALM Octane Pro

Medscheme

“We needed a solution that would scale with us, in terms of both maturity and complexity of process. Without ALM, achieving this objective would require a significantly larger team to ensure sufficient test coverage for the volume of changes.”
