

# Content Manager 10

Micro Focus Content Manager is a governance-based enterprise content management (ECM) system that provides complete information lifecycle management for enterprises across the globe. It is a comprehensive, out-of-the-box software solution that enables you to effectively manage and collaborate on documents and records, email, Web content, images, video, and workflows to achieve business objectives. Content Manager is all about bringing your information to life and managing it as efficiently and completely as possible from creation to disposal, beyond the lifespan of your projects, staff, and business applications.

## Insurance Company

**“With Content Manager, we didn’t have to change the way we run our business. It’s flexible. It adapted to us.”**

VP OF IT

### What's New with Content Manager?

- The Content Manager Web Client has been further enhanced for an enriched, more productive and fully configurable user experience, including:
  - New home page features (retention schedules, holds)
  - Faster search interface
  - New UI layout for user actions
- Desktop client gets new features which enhance the User and functional experience. A new user dashboard to show the predefined work items as a list. An explorer window which shows a hierarchical view of

records are all geared towards enhancing the user experience, and a new recycle bin to take care of unintentional records.

- Content Manager 10 provides greater efficiencies and reduces management overhead, including:
  - Enhancing Elastic Search
  - Improved Text Indexing
  - Improved Auto-Classification
  - IDOL and Keyview 12.7 support
  - SDK Improvements for reporting and 3rd party integrations
- This release offers further and deeper integration with Microsoft technology:

- New Office Online (Microsoft 365) integration
- One Drive integration: multi-user collaboration in real time
- SharePoint integration improvements
- Office/Outlook integration consolidation

### Did You Know?

- 87% of customers agree that Content Manager is considered a vital business application within organizations that help capture, manage, access, and secure business documents and records from creation to disposal.
