

Data Protector Enterprise Backup and Recovery

Micro Focus® Data Protector is an enterprise grade backup and disaster recovery solution for large, complex, and heterogeneous IT environments. Built on an adaptive architecture that combines security and analytics, it enables customers to meet their continuity needs reliably and cost-effectively.

What's New Over the Last 2 Years

- **Web-based UI experience**—Manage backup easily and cost effectively with a single dashboard which provides a unified view of hosts, clients, licenses, backup jobs and devices. A consolidated scheduler simplifies and streamlines administration.
- **Integrated reporting**—Analyze and monitor your environment within the Data Protector UI with a broad range of reports which allow administrators to view client backup statistics, licensing, sessions, schedules information, storage pool and media usage, settings and compliance.
- **Automated workflows**—Automate routine IT tasks such as provisioning clients, managing and monitoring Data Protector services, running file system backups and restores, aborting active sessions, or adding and decommissioning virtual machines with Operations Orchestration.
- **Secure communication model**—Mitigate security risks from threats such as ransomware and make the backup environment more reliable with a new security model which made communication between DP components more secure and consolidated network ports.
- **Integrations with leading cloud providers**—Simplify backup to the cloud with native integrations with Microsoft Azure and Amazon S3 and S3 API-compliant Ceph and Scality, and via a gateway. Support for HPE StoreOnce Cloud Bank and EMC Cloud Tier.

- **Advanced integrations with applications and storage platforms**—Protect backup data across hybrid IT and optimize performance with an expanded list of integrations with 3rd party storage (HPE, EMC, NetApp), virtualization platforms (VMware, Hyper-V), and applications (Oracle database, SAP HANA, SQL Server, etc.).

Did You Know?

1. Two editions are available: Data Protector Premium for hybrid IT and Data Protector Express for virtualized environments.
2. [DocOps](#) is a new centralized online portal with easy access to product documentation from anywhere, on any device.
3. [Idea Exchange](#) allows customers to submit enhancement requests to improve our products and engage with PMs and SMEs.
4. First ITOM integration, BVD displays point in time backup data accessible from anywhere for executives to monitor. Download BVD and documentation from [ITOM Marketplace](#).

“Thanks to Micro Focus Data Protector, our teams are empowered to go beyond simply backing up data. We’re now able to design processes and workflows that optimize the agency’s ability to recover critical data for end-users, and ultimately the public.”

KIM CHEN

Sr Systems Administrator
Washington State Department of Transportation

5. Best-in-class support for HPE Storage now includes certifications for Nimble and SimpliVity as well as out-of-the-box support for StoreOnce Cloud Bank which allows to upload backup data to the cloud.
