Net Express and Server Express 5.1

The Net Express and Server Express product line is maintained exclusively for use by existing customers and is no longer generally available. The successor product line for existing users is Micro Focus Visual COBOL.

Product Highlights

This product line is maintained to support the needs of OpenText™ customers with applications already deployed using this product line. Technical support and engineering availability is still provided for the documented platform and 3rd party software list. For additional platform requirements, please refer to the Micro Focus™ Visual COBOL datasheet.

Key Benefits
