

Academic License Agreement Annual Fee Worksheet - USD

NOVEMBER 2021

[Academic Program Information Link](#)

Product Selection Instructions:

As part of the compliance and annual order process, this worksheet must be sent to EMEA_Contract_Admin@MicroFocus.com (for Europe, Middle East, Africa) or contractadmin@MicroFocus.com (rest of world).

Please indicate the models you will be using: ___ FTE Model; ___ Workstation Model; ___ Dept. Workstation Model

PRODUCT CALCULATION INSTRUCTIONS:

A. Place a mark in the column Model Selected box of the product(s) you wish to purchase OR select a Value Bundle. There is a \$5000 minimum purchase requirement on the ALA.

B. Calculate the Total Bundled Price (TBP) by adding the appropriate prices of the products selected and the appropriate pricing model. You should have a Total Bundled Price (TBP) for each pricing model (Workstation/Dept Workstation, FTE) from which you are purchasing.

C. The Total Bundled Price will be used to calculate the Annual Fee.

You may not use the FTE model in calculating your Annual Fee unless your FTE population exceeds your Workstation count.

TO PREVENT DELAYS IN PROCESSING YOUR RENEWAL ORDER, PLEASE SUBMIT BOTH YOUR PURCHASE ORDER AND COMPLETED WORKSHEET TOGETHER

FTE LICENSE:

Customer must purchase an FTE License for each FTE.

The number of Customer's FTEs shall be calculated as the sum of:

(a) Faculty and Staff FTEs. For the prior academic year, the number of full-time faculty and staff plus the total number of hours worked by part-time faculty and staff in an average work week divided by 40; and

(b) Student FTEs. For the prior academic year, the number of full-time students plus the total number of part-time student credit hours divided by the number of credit hours that Customer uses to identify full-time status.

For Customers that declare a student FTE count in a report to an accreditation or governing board or a government agency, the student FTE account will be the greater of the calculation in subpart (b) above or the FTE count contained in such report.

The FTE calculation for each category of faculty, staff, and students, must be demonstrated through a verifiable means that may include use of an audited annual report, an organization's human resource system, or the government website, government report, or other published report provided by Customer that shows accurate information.

Upon mutual agreement of the source of the data used for the FTE calculations, Licensor will accept calculations based on the source that are up to one year old.

NOTE: Any hospital approved by Micro Focus to purchase under the ALA must purchase under either the FTE Staff and Student or the Workstation pricing schedule for their entire organisation or under the Departmental Workstation pricing schedule if the software is only to be used within a specific department of the hospital. Any academic site not purchasing under the ALA for their entire FTE staff and student count must purchase under the Departmental Workstation pricing schedule unless they are able to take out an ALA contract for a specific entity or department within their academic institution. Should an ALA be taken out by a specific department of an academic site using the Staff and Student FTE count this will preclude that department from offering any use of the software to staff or students of other parts of the institution. This note does not apply to the purchase of Mobile Device Licenses.

When ordering Advanced Authentication or Risk Service Products the total number of users (including all faculty, staff and students) within your systems need to be counted even though you are paying just for the ordered numbers. Therefore please complete the section below to advise your number of users that will use the software.

When ordering ZENworks Patch Management listed below please mark the number of subscriptions if applicable. Due to one key per server, if using the product on multiple servers, you will need to request additional subscriptions. Example: If you have 10,000 nodes across 3 servers, you will need 3 subscriptions and then allocate the number of nodes per server.
