

# Directory and Resource Administrator 10.2.3 Release Notes

November 2023

Directory and Resource Administrator 10.2.3 includes new features and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [Directory and Resource Administrator forum](#) and the [Aegis forum](#), our online community that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in the [Ideas Portal](#).

## What’s New?

- ♦ Administration of the Microsoft Azure Tenant now uses Microsoft.Graph 2.8, replacing the deprecated Azure AD Modules.

---

**NOTE:** It is not recommended to use Microsoft.Graph 2.9 for the administration of Microsoft Azure Tenant. If Microsoft.Graph 2.9 was installed and the system displays an error, see [Troubleshooting Installation and Upgrade](#).

---

- ♦ User Remote mailbox, Shared Remote mailbox, and Resource Migrated Remote mailbox objects are now supported.

- ◆ Beginning DRA 10.2.3, basic authentication is deprecated for managing Azure tenants. Azure tenants can now be managed by using certificate-based authentication only. If existing tenants use basic authentication, upgrading to DRA 10.2.3 still retains the basic authentication settings. However, it is recommended switching to certificate-based authentication.
- ◆ Upgraded to Exchange Online PowerShell module to version 3.0.0, which no longer relies on WinRM basic authentication, as Microsoft has removed its dependency.

## System Requirements

For detailed information on hardware requirements and supported operating systems and browsers, see the [DRA Installation Guide](#) or see the [DRA Systems Requirement](#) reference.

## Installing and Upgrading this Version

- ◆ For information about installing or upgrading NetIQ Directory and Resource Administrator components and modules, see the [DRA Installation Guide](#).

## Supported Upgrade Paths

Use the table below to determine your applicable upgrade path by version. Note that patch versions (x.x.x.x) are not listed. However, all patches for the versions shown are supported. For example, you can upgrade to DRA 10.2.3 from DRA 10.1.1 or any of its patches: 10.1.0.1, 10.1.0.2 and so forth.

DRA Server Base Version	DRA Server Updated Version
10.1.1, 10.2, 10.2.1 or 10.2.2	10.2.3
10.1.1, 10.2 or 10.2.1	10.2.2
10.1, 10.1.1 or 10.2	10.2.1
10.0, 10.0.1, 10.0.2, 10.1, or 10.1.1	10.2

## Addressed Customer Issues

This release includes the following stabilizing fixes:

1. Resolved an issue where the installation of PowerShell Extensions failed on a system that does not have IIS installed. (756001)
2. Resolved an issue in the Web Console that prevented modification of the value of Info attribute for a Computer object. (788043)
3. Resolved an issue where there is a data mismatch in viewing the properties of remote user mailboxes, due to communication with wrong domain controllers. (658008)
4. Resolved an issue that prevented you from viewing temporary group assignments after upgrading DRA to 10.2.x version. (790013)
5. Resolved an issue that prevented you from viewing and modifying the properties for following mailboxes: Migrated remote user mailboxes, migrated remote shared mailboxes, and migrated resource mailboxes. (639077) (732016)
6. Resolved a issue that allowed non-administrators to gain Domain Admin privileges. (875001)

## Known Issues

We strive to ensure our products provide quality solutions for your enterprise software needs. The following issue is currently being researched. If you need further assistance with any issue, please contact [Technical Support](#).

### Mailbox delegation permission Send As not available after creating a remote shared mailbox

The Send As permission in the Mailbox Delegation tab that is available while creating a remote shared mailbox is not available after creating the mail box.

**Workaround:** To view or modify the Send As permission for a remote shared mailbox, go to the Exchange Online Mailbox Delegation tab for the mailbox.

### Exchange online operations fail after resetting the client secret for the Azure application

Exchange online operations of Azure and synced objects fail after resetting client secret using ResetDraAzureApplicationClientSecret.ps1 script and updating it in the Delegation and Configuration Console.

**Workaround:** Kill existing Exchange shells and restart the Administration Service.

### Unable to retrieve the properties of a remote shared mailbox as a user in the recycle bin

An error is displayed when you try to retrieve the properties of a remote shared mailbox when searched as a user in the recycle bin.

**Workaround:** Search as shared mailbox objects in the recycle bin and retrieve the properties.

## Contact Information

We want to hear your comments and suggestions about this book and the other documentation included with this product. You can use the [comment on this topic](#) link at the bottom of each page of the online documentation, or send an email to [MFI-Documentation-Feedback@opentext.com](mailto:MFI-Documentation-Feedback@opentext.com).
