

# SecureLogin 9.0 Quick Start Guide

June 2021

SecureLogin is an enterprise single sign-on product. It provides authentication solutions for web, Windows, host, and legacy applications. SecureLogin functions as a credential provider for all applications that users access. It is also a credential management tool to increase organizations' network security and lower support costs.

It securely manages and encrypts the users credential information in the directory. It stores user names and passwords, and automatically retrieves them for users, when required.

SecureLogin 9 introduces support for single sign-on and multi-factor authentication to enterprise workstations and applications from Azure Active Directory. This release provides a new component, **SecureLogin Advanced Edition**, to serve this purpose. With this feature, SecureLogin extends advanced capabilities such as public cloud adoption, hybrid deployments, and multi endpoint support.

For more information about SecureLogin, see [NetIQ SecureLogin Overview Guide](#).

For more information about SecureLogin Advanced Edition, see [SecureLogin 9 Advanced Edition Installation and Configuration Guide](#).

## System Requirements of SecureLogin

See [NetIQ SecureLogin System Requirements](#).

## Downloading SecureLogin

After purchasing SecureLogin, download the software and the license from the [Software License and Download](#) portal. For information about how to download the product from this portal, watch the following video:

<http://www.youtube.com/watch?v=esy4PTVi4wY>

## Installing the SecureLogin Client

See [SecureLogin 9.0 Installation Guide](#).

It is recommended to refer to the security guidelines available in the [NetIQ SecureLogin 9.0 Security Guide](#) and implement these as required.

## Installing Advanced Edition

See [SecureLogin 9 Advanced Edition Installation and Configuration Guide](#).

## Installing the SecureLogin Client in a Different Locale

The SecureLogin installer detects the default locale on the system and completes the installation. For example, if the default locale on your system is Spanish, SecureLogin is installed in Spanish.

If you want to change the locale, run the following command:

```
NetIQSecureLogin.exe /lang language-code
```

Replace *language-code* with the code from the following supported languages:

- ◆ 1028 - Chinese
- ◆ 1031 - German
- ◆ 1033 - English (default)
- ◆ 1034 - Spanish
- ◆ 1036 - French
- ◆ 1041 - Japanese
- ◆ 1045 - Polish
- ◆ 1046 - Portuguese

For example, to install in French, the command is: `NetIQSecureLogin.exe /lang 1036`

## Modifying, Repairing, or Removing a SecureLogin Installation

See “[Modifying, Repairing, or Uninstalling](#)” in the [SecureLogin 9.0 Installation Guide](#).

## Upgrading SecureLogin

See “[Upgrading](#)” in the [SecureLogin 9.0 Installation Guide](#).

# Resources in the SecureLogin Documentation Library

For the up-to-date documentation, see [SecureLogin Documentation](#).

Resource	Contains
Overview Guide	The overview of the features and functionalities of SecureLogin.
System Requirements	The minimum requirements for installing SecureLogin.
Client Installation Guide	The information about installing, deploying, and upgrading SecureLogin.
Advanced Edition Installation and Configuration Guide	The information about deploying SecureLogin Advanced Edition.
Administration Guide	The information about how to configure and maintain SecureLogin.
Administration Guide for the Application Definition Wizard	The information about the interface of wizards, layout of wizards, how to use wizards to enable applications for single sign-on.
Citrix and Terminal Services Guide	The information about installing, deploying, and upgrading SecureLogin on a Citrix server.
Security Guide	The security guidelines to enhance the security of a SecureLogin deployment.
User Guide	The information about how users to use the SecureLogin Client Utility to customize SecureLogin to their preferences and requirements.
Developer Documentation	The information to help users write or modify application definitions for single sign-on-enabled applications.
API Guide	The step-by-step instructions for using SecureLogin APIs.
